

Startup Partnering

What we do?

We look to partner with highly ambitious professionals and entrepreneurs who are founding a startup. We will provide the startup with hassle-free end-to-end software development, internet marketing, lead generation and back-office functions while empowering the founders to utilize their specialized domain knowledge to develop the core business of their startup.

Advantages of partnering with us

- Consulting based on extensive experience with setting up and organizing startups
- Extensive experience with software development, back-office functions and headhunting
- Headhunting experience enabling access to deep and cost-effective global talent pool
- Focus on your core business
- Reduce capital and time frame necessary to achieve goals
- Increase overall operational efficiency

Terms of cooperation

Please contact us to discuss our references, the scope of services we can perform and all other details of our potential cooperation.
